

OUR BRANDS. OUR OFFERINGS. OUR STORY.

Adapt. Respond. Deliver.

It's the Company Behind the Machine that Makes a Difference.

Recognized as the leader in fluid truck loading and unloading material handling solutions, FMH Conveyors manufactures, installs and services a complete range of custom engineered and designed conveyors for applications in distribution, manufacturing, assembly, and packaging operations.

Our NestaFlex, MaxxReach, BestFlex, BestReach and BestConnect brands are known throughout the industry for their superior design and functionality. Our products are built to deliver lasting conveyor performance in punishing conditions often associated with shipping and receiving.

We take pride in providing our Customers the right product for their application. We go beyond the details of the initial specifications to correctly identify the equipment solution for their application. Through our years of expertise and leadership in the material handling industry, we have developed a knowledgeable and highly-skilled team.

FMH Conveyors offers superior product service through SupportPro, by providing 24/7 technical support. Whether you need a part shipped or a technician to arrive on-site, our trained and certified technicians will take care of you right away.

FMH Conveyors is a Duravant company.

NESTAFLEX® ***MAXXREACH***® ***BESTCONNECT***®

BESTFLEX® ***BESTREACH***®

NestaFlex is a well known brand throughout the material handling industry. It stands for superior design and functionality allowing complete portability, expansion, contraction, and flexibility. These gravity conveyors are designed to improve shipping, transportation and packaging efficiency in retail store receiving, distribution center shipping and packaging applications.

NestaFlex 200 Roller Conveyors

A light-medium duty, flexible gravity conveyor specifically designed to handle odd shaped boxes, bags, drums, and pails in low to medium volume applications.

NestaFlex Light-Medium Duty 226 Skate Wheel Conveyors

A general purpose light-medium duty, gravity conveyor designed to handle multi-sized packages in low to medium volume applications.

DEVELOPERS
OF INNOVATIVE
SOLUTIONS

Durable, Reliable and Easy to Maintain Products

NestaFlex Heavy Duty 376AL/FL Skate Wheel Conveyors

A heavy duty gravity conveyor sturdy enough to handle large packages in high volume applications. The adjustable leg (AL) conveyor uses hand knobs to set the desired height, while the fixed leg (FL) is preset by set screws based on application.

NestaFlex Heavy Duty 376PL Skate Wheel Conveyors

The leading expandable gravity conveyor for high volume shipping needs equipped with several engineered options including guide track, herringbone transition, and power assist to enhance ergonomics and productivity.

BestFlex is recognized throughout the world as the brand that saves time, reduces labor costs, and increases overall efficiencies in a wide range of shipping, receiving and manual sortation applications. BestFlex power conveyors provide the same function and versatility as gravity systems, but with the benefit of powered rollers. Flexible powered conveyors move various package sizes any distance at variable rates of speed. They provide maximum productivity in shipping, receiving and packaging applications where usability and adaptability are needed.

Solutions for Maximizing Productivity

BestFlex 1.9 Flexible Power Conveyors

Similar in functionality to the BestFlex 1.5 power series, these conveyors are designed with stronger components. Upgrades include 1.9" Ø (dia.) steel rollers, 8" x 2" casters, and 2" aluminum side plates. They are engineered to withstand heavy duty applications in distribution centers and warehouses.

BestFlex 1.5 Flexible Power Conveyors

The BestFlex 1.5 power conveyors offer consistency and quality in shipping or receiving up to thousands of packages a day. Manufactured with 16 gauge precision bearing 1.5" Ø (dia.) steel rollers, 6" x 2" heavy duty casters with brakes, and 1.59" aluminum extruded side plates, these conveyors are high performers in distribution centers and warehouses. They offer a maximum compaction ratio to take advantage of your valuable floor space.

FMH
CONVEYORS
A DURAVANT COMPANY

MaxxReach has a long history of supplying the material handling industry with high volume loading and unloading solutions. With multiple options and diverse capabilities, operators can customize this conveyor to meet specific application needs. Our state-of-the-art engineered design incorporates quality, ergonomics, and safety into each order. The MaxxReach telescopic conveyor provides the highest level of productivity for large volume shipping and receiving applications in distribution centers.

We spend the time needed to fully understand the application, so our design is the perfect solution for your needs.

FMH
CONVEYORS
A DURAVANT COMPANY

BestReach is an established brand with a long-standing reputation for quality and reliability. These rigid conveyor systems offer the highest level of ergonomic benefits and safety controls available in the industry. They are built tough to handle heavy volume and high impact shipping applications that run multiple shifts throughout the day. The belt drive out conveyors provide complete product control with the reliability of the continuous belt surface, while the roller drive out conveyors include accumulation options to maintain throughput with zone controlled package spacing to prevent product damage.

BestReach Rigid Belt Conveyors

Designed to service 53' and pup trailers, this conveyor easily powers in and out with no operator effort.

Premium Quality Products that Offer More Value

BestReach Rigid Roller Conveyors

Similar to the belt conveyor, this rigid roller conveyor is specifically designed with accumulation options for a single operator to float across multiple dock doors to maintain efficiencies.

BestConnect was initially designed for E-commerce applications, and the modular system is easily reconfigured to meet variable demands during seasonal peaks. This is an innovative system that easily links BestConnect components with flexible or rigid conveyor systems to make loading, unloading and manual sortation faster and more efficient. The BestConnect system is ideal for startup operations or facilities needing seasonally increased capacity.

ENGINEERED
EQUIPMENT

More than Equipment.
A Complete Solution.

The BestConnect System

Each section of the BestConnect system is designed on casters for easy portability. Depending on the application, sections can be used independently or as a complete system by easily attaching multiple units together. The BestConnect system can also be added to existing conveyor configurations with a standard 120VAC power connection.

90° Curve

Ball Transfer

Conveyors withstand brutal conditions every day with thousands of time-sensitive products flowing in and out of facilities. We understand that following routine maintenance schedules, keeping replacement parts on hand and providing our Customers and maintenance technicians with regular training, results in maximum life of your FMH Conveyors' equipment. During recommended quarterly onsite visits, your SupportPro™ representative will review your spare parts inventory to ensure your facility has the correct amount in-house for improved system reliability and uptime.

We take pride in developing a mutual partnership with our Customers that enables us to provide support throughout the entire lifecycle of our equipment. It's not only about being on call when you need us. From preventive maintenance to operator training to monitoring the performance of your equipment, our commitment is to improve operations and avoid the problems that cause costly downtime.

CRITICAL SPARE PARTS KITS

Spare parts are a key element to ensuring around the clock performance. We have stocked parts inventory covering all generations and models of our installed base of conveyors. To ensure consistency and reliability, it is important to always use only genuine OEM parts from FMH Conveyors as replacements on our equipment.

SUPPORTPRO™ CALL CENTER

We are committed to providing superior equipment service. While some of our products are less complex and may only require an owner's manual or spare parts kit for servicing, others are more sophisticated and benefit from a planned preventive maintenance program for improved system reliability, long-term use and lower total cost of ownership. However, when the need is immediate, whether it's during the day, in the middle of the night, on a holiday or weekend, we know it's critical when a conveyor goes down. Our SupportPro™ staff is available to answer the call, troubleshoot the problem, and arrange for a SupportPro™ technician to be on-site quickly.

Our technicians are fully trained & certified on your equipment. Phones are staffed 24x7; please call **1-844-FMH-SERV** today to schedule your SupportPro™ service.
