

RAYMOND | WEST
INTRALOGISTICS SOLUTIONS

MODULAR CONVEYOR SOLUTIONS

Our modular systems can be installed in days and are designed to be easily moved and modified, ensuring a seamless fit for your business needs. Coupled with our robust construction, simple maintenance requirements, and compatibility with 120-volt power supply, we offer both manual and automatic sortation to streamline workflow.

MODULAR MOBILE CONVEYORS

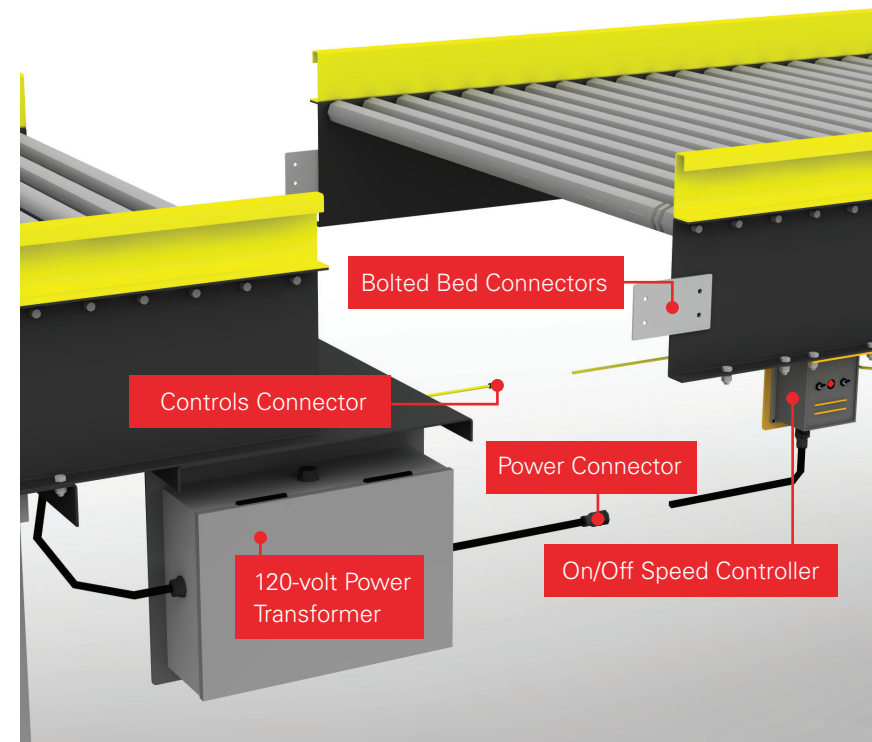

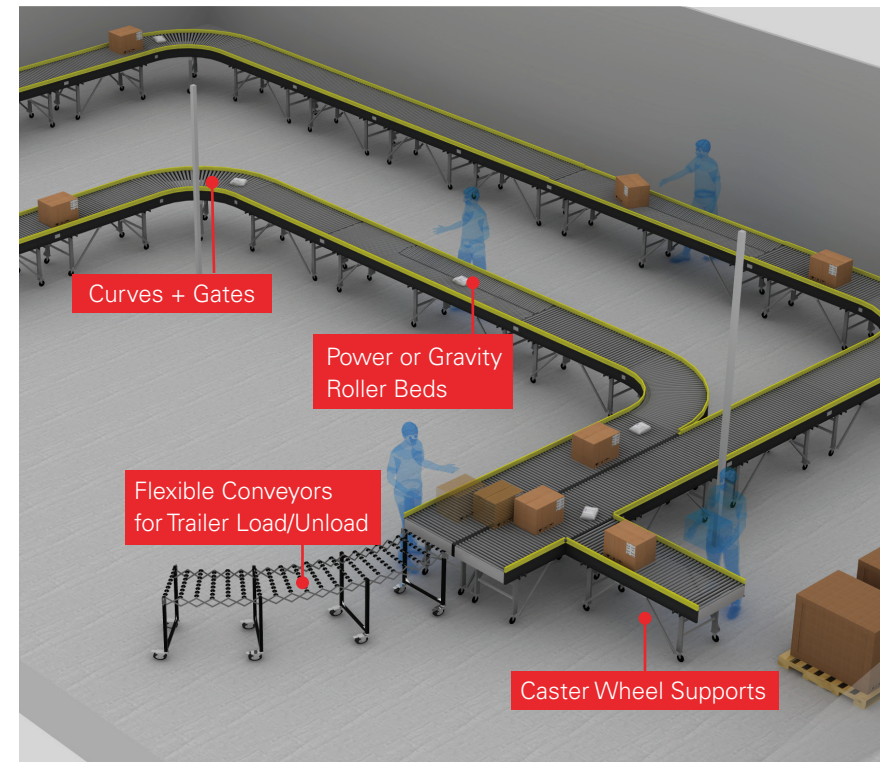

are a perfect match for 3PL operations with continually changing demands. Designed for rapid deployment of e-commerce delivery facilities, Raymond West has installed more than 300 of these mobile modular systems throughout North America, while providing 24x7 support.

The design of our plug-n-play modular controls eliminates large control panels and permanent electrical wiring. Simply connect the conveyor beds.

- ✓ Single-phase 120-volt power supply means less permit restrictions.
- ✓ Installation takes 50% less time than traditional systems, lowering your costs
- ✓ MDR motors keep maintenance simple. Replacing a motorized roller only takes minutes.
- ✓ Optional caster wheeled supports allow you to push the conveyor beds into new locations or store when not in use.

Available Modules

Straight Beds, Curves, Gates, Centering Herringbone Beds, Inclines/Declines and Elevated Beds

MODULAR AUTOMATED SORTATION

Quickly implements automatic sortation with a similar design to our modular controls to reduce your need to manually sort packages. Conventional sortation equipment requires extensive on-site installation and integration whereas our modular solution focuses on a high degree of pre-engineered, pre-tested components to Plug-N-Play.

- ✔ Sorts both poly bags and cartons
- ✔ Singulates bulk flows of packages
- ✔ Sorts up to 60 packages per minute
- ✔ Cable-based control wiring for fast set-up
- ✔ Scans and sorts to hoppers, chutes or conveyors
- ✔ Various sorter types available for slower or faster applications

WHY CHOOSE OUR MODULAR CONVEYOR SOLUTIONS

- ✓ Install in Days, Not Months
- ✓ Easily Move & Modify
- ✓ Rugged, Abuse Resistant
- ✓ Manual or Automatic Sorts
- ✓ Simple Maintenance
- ✓ 120 Volt Power Supply

RAYMOND | **WEST** INTRALOGISTICS SOLUTIONS

Raymond West is a leading global provider of best-in-class material handling integrations and intelligent intralogistics solutions. Our solutions optimize and transform entire operations through automation.

OUR VISION

Establish a new standard for powering the world's leading businesses with optimized end-to-endless intralogistics solutions.

OUR MISSION

Provide accelerated and optimized intralogistics solutions to solve our client's problems; any challenge they have within their facility moving and storing material - we have the solution. Through our commitment to our clients, we foster lifelong relationships and are dedicated to quality, performance, and continuous improvement with end-to-endless solutions for the world.
